

MOHAMAD SYAHER IZHAM BIN ISSHAMWIL

Alor Setar, Kedah | 013-4647570 | msyاهرizham@gmail.com

PROFILE

Cyber Security student (UPTM) with hands-on experience building applied security tooling and a background in networking, systems administration, and IT infrastructure. Final year project: Campus Shield, an AI-powered phishing detection system for URLs and QR codes, combining rule-based heuristics, an on-device TensorFlow.js neural network, Google Safe Browsing API integration, and Gemini AI semantic analysis in a four-layer detection pipeline. CCNA-certified with practical experience in domain deployment, server infrastructure, and secure system configuration gained across government and enterprise IT environments.

EDUCATION

Universiti Poly-Tech Malaysia (UPTM) <i>Bachelor of Information Technology (Honours), Cyber Security</i>	2024 – Present
Kolej Poly-Tech Mara (KPTMAS), Alor Setar <i>Diploma in Computer System and Networking</i>	2022 – 2024
Kolej Komuniti Bandar Darulaman <i>Certificate in Computer System and Networking</i>	2018 – 2020
Sekolah Menengah Kebangsaan Dato' Syed Omar <i>Sijil Pelajaran Malaysia (SPM)</i>	2013 – 2017

INTERNSHIP EXPERIENCE

Intern, IT Department <i>BDB Infra Sdn Bhd, Alor Setar, Kedah</i>	Jul 2024 – Oct 2024
- Maintained server room availability and data integrity through scheduled monthly backup tape rotation and structured data organization, reducing risk of data loss. - Hardened endpoint deployments by performing clean Windows 10 installs, partition management, BIOS updates, and peripheral configuration, ensuring machines met a consistent secure baseline before handover. - Built and terminated LAN cabling to the T568B standard and performed continuity testing, ensuring network infrastructure integrity and reducing connectivity-related downtime. - Developed a PHP/MySQL Inventory Asset Management System (HTML, CSS, Bootstrap, jQuery, Ajax) with full CRUD functionality, applying input validation to reduce basic injection and data-integrity risks.	

WORK EXPERIENCE

Technical Support Technician <i>Mecacom Technologies Sdn Bhd, Alor Setar, Kedah</i>	2020 – 2022
- Deployed and configured domain-joined desktops and laptops for government clients including SPRM (Suruhanjaya Pencegahan Rasuah Malaysia), JPM (Jabatan Perdana Menteri), and BHEUU, following client security and access policies. - Rolled out desktop workstations, iPads, printers, and POS systems across government agencies, schools, hospitals, and private clients in Putrajaya, Kedah, and Perlis, maintaining consistent configuration standards across sites. - Performed hardware assembly, diagnostics, repair, and preventive maintenance on desktops, laptops, and printers for educational institutions and community centres. - Resolved client-facing IT and connectivity issues under time pressure, minimizing operational downtime across multiple site locations.	

TECHNICAL SKILLS

- Networking: TCP/IP, LAN/WAN configuration, domain setup, Cisco routing & switching (CCNA)
- Operating Systems: Windows (Expert), Linux (Proficient)
- Security Fundamentals: access control basics, endpoint hardening, backup & recovery practices, secure baseline configuration (in progress UPTM Cyber Security programme)
- Hardware: desktop/laptop assembly, diagnostics, repair, preventive maintenance
- Development: PHP (Intermediate), HTML/CSS, JavaScript, jQuery, Bootstrap, Ajax, MySQL

CERTIFICATIONS & AWARDS

- Cisco Certified Network Associate (CCNA) - Cisco Networking Academy
- Final Year Project Award - Attendance Alerting System, Kolej Poly-Tech Mara (KPTMAS) Alor Setar
